

# Air Pollution Report Card

## INDIABULLS POWER LTD.

**Very Good**

| Industry Description      |  | Release Information   |                 |
|---------------------------|--|---|-----------------|
| MPCB Regional Office (RO) | AMRAVATI   | Release Number  | First (Phase-I) |
| Sub-Regional Office (SRO) | AMRAVATI I   | Release Date  | 07-July-2016    |
| Type                      | RED  | What does the rating mean?  |                 |
| Scale                     | L  | INDIABULLS POWER LTD. is rated "Very Good" (5-star) for air pollution.  |                 |
| Sector                    | Power  | Better performing plants (i.e. plants with lower particulate matter (PM) concentration in stack emissions) get more stars. A 4-star or 5-star rating implies that most of the recent stack samples of the plant report PM emissions below a standard of 150mg/Nm <sup>3</sup> . A plant's star rating also benchmarks its relative performance: as of ratings date, 51 percent of rated plants have done better (received 4 or 5 stars) and 33 percent of rated plants have done worse (received 1 or 2 stars). |                 |

### Star Rating Key

## About the Star Rating Program

**Maharashtra Pollution Control Board (MPCB)** has initiated an air pollution information disclosure program to give industries star ratings on the basis of their particulate matter (PM) emissions. These ratings are shared through **Air Pollution Report Cards**. Ratings represent the **air pollution performance** of industries, as measured by their **PM emission concentrations**.

Ratings are based on data obtained from routine stack sampling for PM as supervised by MPCB. Industries are rated according to the median PM emissions concentration of their latest 4 samples.
